Re: Jeff's Ditch Call Received April 11, 2014

Dear Craig,

We are in receipt of your call on Huntington Creek for water delivery to begin today at a flow rate of 8 cfs. Based on preliminary investigations last year, it was determined that approximately 207 acres was being watered at your lower ranch on the Huntington River. Based on your water right of 10 cfs for 517 acres of irrigation, a maximum call of 4.0 cfs can be made. Direction has been given to the River Commissioner to meet this call. If you have any questions regarding this decision please contact me by phone or by e-mail.

If you have additional acreage under irrigation this year, please schedule a site visit with our Price Office and we can make adjustments to the delivery schedule.

Respectfully,

Sue Odekirk, P.E.

Huntington Creek Distribution Engineer
